To Whom It May Concern:

I became acquainted with Kristin Bennett and her capable staff three years ago when Kristin took over planning and operations for the Annual Scientific Conference on behalf of the Colorado Academy of Family Physicians.

Since that time, I have worked with Kristin in various capacities including graphics design, public relations efforts, conference coordination, and continuing medical education offerings.

Kristin takes great pride in her work, and in the service she provides to nonprofit organizations. She possesses a great work ethic and attitude, top technical skills, and pays great attention to detail. These characteristics are visible not only in Kristin, but in the professional staff she employs.

Kristin has worked with Children's Hospital Colorado staff in scheduling and planning speaking engagements and CME sessions to the CAFP. She follows through on every detail with speakers, and demonstrates her ability to work with many various personalities each and every time.

It's my pleasure to recommend Kristin and her staff to any nonprofit organization that demands the best.

Sincerely,

Jeff Cain, MD, President-Elect American Academy of Family Physicians
Chief of Family Medicine, The Children's Hospital
