

Setting the **Standards** for
Home Energy Efficiency

June 6, 2014

To Whom It May Concern:

BIBCA and HPIP have worked with RESNET for the past five years under the leadership of their Executive Officer Kristin Bennett. During that time Ms. Bennett and I have worked to find common ground and create collaboration that works for the members of our respective organizations.

I have enjoyed working with Kristin to build the relationship between our member, and also on special projects of benefit to both organizations. Her leadership style is perfectly matched to the needs of nonprofits working to thrive in a changing world. She is accessible and friendly, and relates well to everyone she comes into contact with from top Executive Levels to Administrative staff.

What I most appreciate about Kristin's leadership style is her strong desire to find the collaborative path in all situations. As nonprofits evolve, collaboration is key. She understands this, and knows how to make it happen.

Whether it's program management or executive level work, I endorse the style, skills, and commitment of Kristin and her staff at YES, LLC.

Sincerely,

A handwritten signature in blue ink that reads "Steve Baden". The signature is written in a cursive, flowing style.

Steve Baden
